

Acknowledgements

This book attempts to synthesise much of what I have come to learn and understand about the West Coast over the past twenty-odd years that I have lived here and been involved in doing research with colleagues and students. I have interacted with many people, both locally and those visiting from elsewhere, and from all of them I have learned a great deal. In particular, I owe special thanks to the students I have had the pleasure of interacting with over the years at the University of Cape Town, and it is to my past students that I dedicate this book. I have taken many undergraduates on field trips to the West Coast and I have supervised Honours (fourth-year) student projects, post-graduate (Masters and doctoral students) and postdocs. Although these students are too numerous to list, many appear as co-authors on publications in the bibliography. These field trips and research projects were made possible by the University of Cape Town, which provided the institutional support and facilities for exploring and learning about the West Coast. Financial support provided to students and their research projects is gratefully acknowledged from the National Research Foundation and the University of Cape Town. I thank the staff of the West Coast National Park, particularly Pierre Nel, and I thank Pippa Haarhoff and the staff of the West Coast Fossil Park for their support and assistance throughout the years. The City of Cape Town, Cape Nature, Council for Geoscience (Bellville office, Marine Geosciences Unit) and the National Geo-Information (Trig Survey) office in Mowbray provided valuable resources.

I thank the many friends, students and colleagues who provided valuable feedback on this book. I was first introduced to the West Coast by John Rogers in March 1995, and he has always been a rich source of information. I am grateful to the following for permission to use their photographs and illustrations: Balcarres Heritage Trust, Stefan Bengtson, Ian Brumfitt, Ross Compton, ComputaMaps (Justin Hyland), Guiliana Franceschini, Melody Fynn, Magnus Haaland, Trevor Hardaker, Christopher Henshilwood, Andy Herries, Phil Janney (John Gurney's photo), Alex Kisters, Anton le Roex, Mac MacHutchon, Joselyn Mormile, Ted Scambos, Matt Stow, Pierre-Jean Texier, Jean Tresfon, Joré and Chris von Holdt, and Bernard Wooding (my apologies to anyone I may have forgotten!). Finally, I owe a very special thanks to my wife, Lisa, for joining me on many West Coast outings and in reading the many drafts and for always providing invaluable feedback on all aspects of the book.

Notes

Preface

1. Leveson (1972).
2. Abram (1996).
3. Lopez (1986).

Chapter 1

1. McCarthy and Rubidge (2005) provide an excellent overview of the building of the southern African continent.
2. Reid (2016); Japan is a modern example of a volcanic island arc.
3. Kisters and Belcher (2018).
4. Scheepers and Armstrong (2002), and references therein.
5. Penny and others (2014).
6. Bengtson and Zhao (2002).
7. Kisters and others (2015).
8. Master (2009).
9. Playfair and Hall (1813).
10. Lyell (1833:354) (No. 85).
11. Scheepers and Nortjé (2000).
12. Gray and others (2008).
13. Hutton (1788).
14. Playfair (1802).
15. Braddy and Almond (1999).
16. Blewett and others (2019).
17. Gabbott and others (2016).
18. Hansma and others (2015).
19. [wiki/Appalachian_Mountains](https://en.wikipedia.org/wiki/Appalachian_Mountains)
20. Backeberg and others (2011).
21. Hawthorne (1975).
22. Jungslager (1999).
23. Compton (2004: Fig. 16).
24. Brown and others (1999).
25. Smith (2006).
26. Von Buchenroder (1830).
27. Burchell (1822–4:24–25).
28. Compton (2016:169).
29. Hoernle and others (2015).
30. Curtis and Hyam (1998).

32. Herbert and Compton (2007), and references therein.
33. Baxter and Meadows (1999).
34. Bergh (2012).
35. Moolman (1946).
36. Herbert and Compton (2007).
37. Smith and Compton (2004).
38. Compton (2007).
39. Swart and Fleming (1980).
40. Franceschini and Compton (2006).
41. Corbett (2016).
42. Franceschini and Compton (2004).
43. Ward (1983).
44. Vermeesch and others (2010).
45. Roberts and Berger (1997).
46. Compton (2001).
47. Marsh and others (2018).
48. Von Buchenroder (1830).
49. Fynn (2008).
50. Halley (1728).
51. Smith and others (2018).

Chapter 2

1. 2017 world energy consumption of 6.2×10^{20} joules (eia.gov) divided by 8.9×10^{16} joules/second from the Sun (sandia.gov) (SolarFAQs.pdf) = 1.9 hours.
2. Nutman and others (2016); Sugitani and others (2015).
3. Campbell and others (2017).
4. Weeks and others (2004).
5. Compton and others (2000).
6. Compton and others (2004); Compton and Bergh (2016).
7. Branch and Branch (2018) (a good general reference to life on West Coast shorelines).
8. Bolton and Blamey (2017).
9. Slenzka and others (2013).
10. Mora and others (2004).
11. Compton (2001).
12. Crowther and others (2015).
13. McAuliffe and others (2019).
14. Manning and Goldblatt (2012).
15. Snijman (2013).
16. Friends of Rondebosch Common (2008).
17. Deacon and Deacon (1999).
